DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the glue channel, although identified, must be *clearly* shown or the feature(s) canceled from the claim(s). No new matter should be entered.

The drawings are objected to because the specification detail a trunk; however, there is no reference numeral identifying the trunk element in the figures. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filling date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,13,18 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent #7,040,058 to FINKELSTEIN. FINKELSTEIN discloses a plastic, column 3, lines 52-60), bird deterrent including a base (42A-C) having a plurality of branched

spikes (14,16) extending therefrom. Regarding claims 13 and 18, the structure of FINKELSTEIN inherently details the method of fabricating the bird deterrent, as detailed above, including the steps of molding the spikes (14,16) and base (42A-C) as a single unit. In reference to claim 19, FINKELSTEIN discloses the use of end spikes (44) that are vertically oriented.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-4 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent #6,546,676 to WIESNER et al. WIESNER et al. discloses a bird deterrent including a base (1) having a plurality of branched spikes (15) extending therefrom; wherein the base is molded plastic and the spikes have plastic molded there around, column 3, lines 55-63. Although the pins of WIESNER et al. are formed of a different material, WIESNER et al. discloses enclosing the pins in plastic. Since it is the

final product in apparatus claims that is given patentable weight, it would have been obvious to one having ordinary skill in the art at the time the invention was made that the final product of WIESNER et al. is a unitary product. In reference to claim 2, the spikes (15) include a trunk (18) each having a plurality (two) of spikes (15). Although the spikes are not fluted or ribbed, ribbed spikes are old and very well known in the art. Thus it would have been obvious to one having ordinary skill in the art at the time the . invention was made to provide the spikes of WEISNER et al. with ribs, in order to strengthen the length of the spike thereby allowing the spike to handle more weight or larger animals there about. Regarding claim 4, WEISNER et al. discloses the use of breaking points (3) formed on the base (1). In reference to claim 13, the structure of WEISNER et al. inherently details the method of fabricating the bird deterrent, as detailed above, including the steps of molding the spikes (15) and base (18) as a single unit because the spikes (15) are molded with the plastic material of the base (1) there around forming a one piece member.

Allowable Subject Matter

Claims 5-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yvonne M. Horton whose telephone number is (571) 272-6845. The examiner can normally be reached on 6:30 am - 3:00 pm.

Application/Control Number: 10/508,804 Page 6
